Albany Medâ€™s vascular program has one of the most highly-regarded vascular teams and is the largest provider in the northeast. The team is visited regularly by colleagues worldwide and has pioneered numerous procedures that are now standard in the field.

Vascular Surgery - Albany Medical College
Journal of Vascular Surgery® is dedicated to the science and art of vascular surgery and aims to be the premier international journal of medical, endovascular and surgical care of vascular diseases. Since the first issue was released in 1984, the goal of the journal has been to improve the management of patients with vascular diseases by publishing relevant papers that report important ...

Vascular surgery is a surgical subspecialty in which diseases of the vascular system, or arteries, veins and lymphatic circulation, are managed by medical therapy, minimally-invasive catheter procedures, and surgical reconstruction. The specialty evolved from general and cardiac surgery as well as minimally invasive techniques pioneered by interventional radiology.

Vascular Access | National Kidney Foundation
Interventional radiology (IR) is a medical specialty which provides minimally invasive image-guided diagnosis and treatment of disease. Although the range of procedures performed by interventional radiologists is broad, the unifying concept behind these procedures is the application of image guidance and minimally invasive techniques in order to minimize risk to the patient.

x Goal: Due to multiple failures to translate basic research, the need for novel therapeutic targets and strategies is still urgent to save a larger number of the stroke patients’ population and to reduce the toxicity of the current stroke therapy. Method: We summarize the most recent, within past 5 years, basic and clinical diabetic stroke research findings.

Welcome Message from Chair From Dr. Hazim Safi, Chair of Cardiothoracic and Vascular Surgery. It has been my privilege to be trained by the best surgeons in Europe and the United States, and I enjoy continuing to perform and teach about operations that can significantly improve chances for health in the face of life-threatening disorders.
Annual Report 2017 Annual Report. In this edition, we convey the strong spirit of innovation and leadership Memorial Hermann has long embodied. In 2017, we increased our drive and determination, continuing to evolve to meet the challenges confronting hospitals in today’s complex healthcare environment while providing the community greater access to safe, high-quality care.

Ruptured abdominal aortic aneurysm (AAA) is one of the most fatal surgical emergencies, with an overall mortality rate of 90%. Most AAAs rupture into the retroperitoneal cavity, which results in the classical triad of pain, hypotension, and a pulsatile mass. However, this triad is seen in only 25â€“50% of patients, and many patients with ruptured AAA are misdiagnosed.

Ruptured abdominal aortic aneurysm: a surgical emergency ...
