A disruptive innovation, by definition, starts from one of those two footholds. But Uber did not originate in either one. It is difficult to claim that the company found a low-end opportunity ...

What Is Disruptive Innovation? - hbr.org
The resource curse, also known as the paradox of plenty, refers to the paradox that countries with an abundance of natural resources (such as fossil fuels and certain minerals), tend to have less economic growth, less democracy, and worse development outcomes than countries with fewer natural resources. There are many theories and much academic debate about the reasons for, and exceptions to ...

1. Introduction. The link between leadership and innovation has gained increasing attention in the literature. Some researchers proposed that leadership is one of the most influential predictors of innovation (Manz et al., 1989, Mumford et al., 2002). A recent special issue of The Leadership Quarterly on organizational learning shows the importance of leadership for innovation and ...

Explaining the heterogeneity of the leadership-innovation ...
Why feeling like a fake can be a sign of growth. Authenticity has become the gold standard for leadership. But a simplistic understanding of what it means can hinder your growth and limit your impact.

3. Research design. The theoretical framework described in the previous section allows us to answer the main research question of the paper: â€œ How does a firm in a mature industry use the different managerial levers along the three phases of the organisational change process to implement each of the two dimensions of Open Innovation?

The Open Innovation Journey: How firms dynamically ...
The purpose of this paper is to present an analytical review of the educational innovation field in the USA. It outlines classification of innovations, discusses the hurdles to innovation, and offers ways to increase the scale and rate of innovation-based transformations in the education system.

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.
